SUMMARY

As an energetic and passionate Principal Software Engineer proficient in Golang, Node.js, and PHP, I thrive on challenges and embrace a "whatever it takes" attitude. With hands-on experience in Golang, PHP, CodeIgniter, Laravel, Node.js, Express, React.js, and MySQL with Sequelize ORM, I seek opportunities to enhance my abilities in a reputable organization and drive innovative solutions. Let's shape the future together!

EXPERIENCE

Principal Software Engineer | Golang | NodeJS Developer

Teo international (Pvt) Ltd. FEB 2022 – APRIL 2023

My primary responsibilities were:

- Server-side using Golang with gRPC.
- Handle the automation of code through unit test cases.
- Integrated the microservices with the Krakend API gateway.
- For cache management, I implemented Redis.
- To facilitate messaging between components, I utilized Apache Kafka as the messaging broker.
- Integrated Google Fire store and MongoDB for data storage and management.

Tools & Techs: Node.js, Golang, Go Fiber/Gin, gRPC, GCP (google cloud platform), Krakend Api gateway, Docker, Kubernetes.

Golang Projects URL:

- <https://gotoko.co.id/>
- <https://www.qwibbs.com/>

Senior Node.js & GraphQL Developer

Ideal Innovative Solution APR 2021 – DEC 2021

- Worked as a Lead Node.js developer with GraphQL Apollo Server.
- Developed APIs for frontend Single Page Application (SPA) using Angular.
- Utilized MongoDB as the database for seamless data management.
- Integrated third-party payment systems for enhanced functionality.

Tools & Techs: Node.js, Node express, GraphQL apollo Server, Mongo Db, Braintree, Square Api, QuickBooks, Git(hub).

Node.js Projects URL:

- <https://pos.stg.techbar.com/>
- <http://premieruk-dashboard.herokuapp.com/>

Senior (PHP, Node | React) Developer

HyCube-Tech DEC 2019 – MAR 2021

I was responsible for working on a variety of products while leading a team of developers.

My key responsibilities included:

- Optimizing and reviewing code produced by the team of developers.
- Implementing CI/CD (Continuous Integration/Continuous Deployment) for streamlined and automated deployments.
- Integrated sockets for real-time chat applications.

Tools & Techs: Node.js, Node express, Vue.js, Laravel, PHP, MySQL, Mongo DB, Git, Bitbucket, Bootstrap, Material UI.

PHP Projects URL:

- <https://babarrashid.com/login>

Node.js | React.js Projects URL:

- <https://e-super-store.netlify.app/#/>
- <https://tutors-app.netlify.app/>
- <https://mybarbarshope.netlify.app/#/>

PHP CodeIgniter/Laravel developer

Fincon Services MAY 2018 – DEC-2019

Worked as a PHP MVC Developer during my stay at Fincon-Services.

Contributed to various projects, including:

- Health applications (e.g., HR modules)
- Laboratory systems
- IPD (In-Patient Department) solutions
- Daycare applications

Tools & Techs: PHP, MySQL, CodeIgniter & Laravel Bootstrap, jQuery, Ajax, SVN.

Projects URL:

- <http://40.87.80.211:1600/cmms/login/>
- <https://www.texasstarpharmacy.com/>
- <http://115.42.64.81:8099/hrm/>

PHP CodeIgniter developer

Emergent Soft MAR 2016 – APR-2018

My responsibility involved converting the entire product from Smarty (template engine) and core PHP to PHP MVC CodeIgniter framework.

Additionally, I managed WordPress plugins and websites, ensuring their smooth functioning and maintenance.

Projects URL:

- <https://www.tucuentas.com/>
- <https://www.trustedcarbuyers.com/>
- <https://rydalutilities.co.uk/>

Tools & Techs: PHP, CodeIgniter, Bootstrap, jQuery, Ajax, Smarty.

Software Development (Internship)

VU Software House FEB 2015 – FEB-2016

During internship at virtual university software house, I have successfully completed my final year project under the Super vision of industry expert.

Tools & Techs: PHP, CodeIgniter, Bootstrap, jQuery, Ajax, Google Map APIs.

SKILLS

- Golang, gRPC, go fiber, Go Gin.
- PHP, MySQL with Sequelize ORM.
- MVC CodeIgniter/Laravel
- MongoDB, (Mongoose client).
- Git (Gitlab, GitHub) SVN (TFs, bitbucket).
- Netlify (CI/CD pipeline).
- Aws (Amplify, EC2).
- Docker (Container, Images), Kubernetes
- Kraken API Gateway.
- GCP (Google cloud platform).
- Node.js with Node express,
- React.js, Redux (state management)
- JavaScript, jQuery, Ajax.
- Bootstrap, html, CSS.
- Heroku (CLI, git Repo pipeline).
- Redis Cache, Apache Kafka
